#ALUMINIUM COMPOSITE PANEL

Centery Bond India PVT LTD with an impressive portfolio of manufacturing, marketing and exports is a name to vouch for in the field of aluminium panels.

The company employs a team of highly experienced and qualified engineers as also production experts and office staff. A golden trail of work because of years of consistent and efficient service has made us a brand synonymous to trust and faith.

Apart from the track record, it is flexibility and attention to details that has imparted Centery Bond the edge and has helped it acquire a unique market position.

Over the span from its inception till today, Centery Bond has strictly adhered to industry-prescribed norms. The planning, the system of work as well as the product manufacturing- everything is done in accordance with the standard guidelines. This has made getting product approvals easy and has opened the door for entry into the new market.

The strength lies in the development and production of Quality Specialist industrial and commercial laminated of injected composite panels to suit individual requirements.

Centery Bond with high end German Technology was formed to service a specialist market.

The strength lies in the development and production of customised and high-grade laminated composite panels.

The product is manufactured as per strict quality procedures and is further fine-tuned to suit individual requirements.

At Centery Bond, customer satisfaction is of utmost importance. The marketing team reaches out to customers and the wide-spread network of dealers and distributors across India fulfil their requirements.

With firm determination and commitment to quality, Centery Bond is the rising Sun of the new age.

FIRE-RETARDANT

FR Grade

Aluminium Composite Panel

CENTURY BOND FR Grade material is excellent amalgamation of two aluminium coils, Its surface is coated with PVDF coating which gives superior strength to product. FR Grade material is available in wide range of textures and colors.

Fire Grade ACP.

Fire-retardant (FR) materials have become an important ingredient in modern construction. With more and more skyscrapers towering towards the skies in bustling cities, fire protection has taken centre stage across the world. Using genuine FR material is critical to safety in the Fire Rated Construction System.

A typical ACP-cladded façade in india has a frame structure comprising a non-load-bearing brick wall. followed by plaster, steel frame and an ACP envelope fixed on the frame. As an important criterion for resistance to fire, the ACP envelope should contain fire and retain its structural integrity up to 2 hours But that's not the only feature that contributes to fire protection. An authentic rating for resistance to fire also takes into account that smoke kills faster than fire, among other vital factors. This is where Imperia Decor's FR ACP, FireWall stands above the rest.

Technical

ALUMINIUM COMPOSITE PANEL

ADVANTAGES OF CENTERY BOND

- Ultra modern look and excellent flatness can be shaped and formed without any loss of surface integrity
- Light weight, Reducing frame loading and installation costs.
- Good Sound insulation-reduces unwanted vibrational noise
- Ease of insulation and fabrication can be bent, cut, drilled, punched, stamped and shaped into complex shapes
- Resistance of extremes of weather exposure and temperature
- Excellent UV characteristics retains colour after long exposure
- Smooth paint finish and lacquering - 3 layer PVDF 70% Kynar-500
- Superior flatness ideal of creating smooth, monolithic surface
- High impact resistance.
- Pollution, acid, alkali and self-sprey resistance finish
- Very low coefficient of expansion.
- Minimum maintenance.
- Wide range of choice available.
Can be cleaned using detergents.
- Anti-Fungal protection.

SUGGESTION

- To ensure colour consistency, the total requirement for a project is advised to be placed in one order. It is also recommended to install the panels in the same direction as marked arrow on protective peel-of-film to avoid possible reflection differences
- Customer colours are also available upon request for solid colours, metallic colours and special finishes etc. Subject to the respective minimum quantity.
- Colour may vary from batch to batch (± 5)

APPLICATION AREA

- Centery Bond is the most versatile product for exterior and interior use
- Exterior (curtain walling and wall paneling) of high rise apartments, industrial and commercial buildings, hospitals, hotels, gas stations, shopping malls, educational institutes, convention centers etc.
- Roof edging and spandrel panels, wall and ceiling panels, beam wraps etc.
- Face lift / retrofit offer buildings columns and beam covers. Interiors (wall and Ceilings) of shops apartments, offices, workshops, showrooms, elevators etc.
- Store canopies, shop fronts, sign-boards, display units, vehicle bodies, sign-posts etc.
- Innovative furniture, partitions etc
