ALUMINIUM COMPOSITE PANEL

Perfection in every  
*piece*

The ultimate choice of architects & consultants.

Century Bond India PVT LTD with an impressive portfolio of manufacturing, marketing and exports is a name to vouch for in the field of aluminium panels.

The company employs a team of highly experienced and qualified engineers as also production experts and office staff. A golden trail of work because of years of consistent and efficient service has made us a brand synonymous to trust and faith.

Apart from the track record, it is flexibility and attention to details that has imparted Century Bond the edge and has helped it acquire a unique market position.

Over the span from its inception till today, Century Bond has strictly adhered to industry-prescribed norms. The planning, the system of work as well as the product manufacturing- everything is done in accordance with the standard guidelines. This has made getting product approvals easy and has opened the door for entry into the new market.

The strength lies in the development and production of Quality Specialist industrial and commercial laminated of injected composite panels to suit individual requirements.

Century Bond with high end German Technology was formed to service a specialist market.

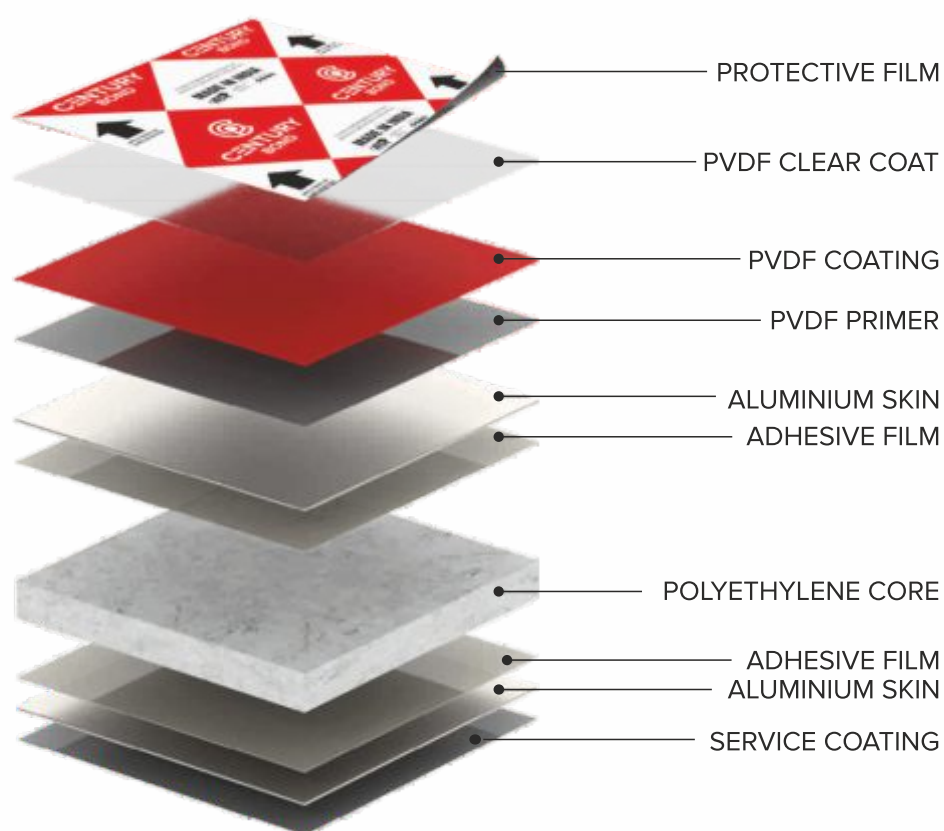

The strength lies in the development and production of customised and high-grade laminated composite panels.

The product is manufactured as per strict quality procedures and is further fine-tuned to suit individual requirements.

At Century Bond, customer satisfaction is of utmost importance. The marketing team reaches out to customers and the wide-spread network of dealers and distributors across India fulfil their requirements.

With firm determination and commitment to quality, Century Bond is the rising Sun of the new age.
